

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

Claim 1 (Currently Amended): An oil based ink composition for inkjet printer comprising fine particles in a non-aqueous dispersion medium, the fine particles being obtained by melting and kneading a coloring agent and a binder resin, and cooling and pulverizing the resulting mixture to form a colored admixture, [[:]] and dispersing the colored admixture ~~fine particles comprising coloring agent and binder resin~~ in the non-aqueous medium, wherein the binder resin comprises a copolymer which is insoluble in the non-aqueous dispersion medium and comprises (a) a monofunctional monomer A containing an aliphatic cyclic hydrocarbon group having from 5 to 30 carbon atoms and (b) a monofunctional monomer B, which is capable of copolymerizing with the monofunctional monomer A and a homopolymer of which is soluble in the non-aqueous dispersion medium.

Claim 2 (Currently Amended): The oil based ink composition for inkjet printer as claimed in Claim 1, wherein the monofunctional monomer A containing an aliphatic cyclic hydrocarbon group having from 5 to 30 carbon atoms is a monomer represented by the following formula (I):

wherein, X^0 represents a connecting group selected from the group consisting of $-\text{COO}-$, $-\text{OCO}-$, $-(\text{CH}_2)_k-\text{OCO}-$, $-(\text{CH}_2)_k-\text{COO}-$, $-\text{COO}(\text{CH}_2)_k-$, $-\text{COO}(\text{CH}_2\text{O})_k-$, $-\text{CONHCOO}-$, $-\text{CONHCONH}-$, $-\text{O}-$, and a combination of these groups; k represents an integer of from 1 to 3; a^1 and a^2 , which may be the same or different, each represent a hydrogen atom, a halogen atom, a cyano group, a hydrocarbon group, $-\text{COO}-Z^1$ or $-\text{COO}-Z^1$ connected through a hydrocarbon group; Z^1 represents a hydrogen atom or $[[\text{an}]]$ a hydrocarbon group; and Q^0 represents an aliphatic cyclic hydrocarbon group having from 5 to 30 carbon atoms.

Claim 3 (Original): The oil based ink composition for inkjet printer as claimed in Claim 1, which further comprises a dispersant for pigment.

Claim 4 (Currently Amended): The oil based ink composition for inkjet printer as claimed in Claim 1, wherein the coloring agent is coated with the binder resin to form a the colored admixture ~~and the colored admixture has the maximum particle size of not more than 1 μm and an average particle size of from 0.01 to 0.5 μm .~~

Claim 5 (Canceled)

Claim 6 (New): The oil based ink composition for inkjet printer as claimed in Claim 1, wherein the fine particles have a maximum particle size of not more than 1 μm and an average particle size of from 0.01 to 0.5 μm .
